COURSE MODULES

Module 1: Introduction to Apple Motion

- Overview of Apple Motion
- Understanding the interface & workspace
- Preferences & project settings
- Importing media & assets

Module 2: Working with Layers & Groups

- Understanding layers & groups
- Organizing elements in the timeline
- Using blend modes & opacity
- Masking techniques

Module 3: Animations & Keyframes

- Introduction to keyframing
- Using the Record button
- Motion paths & custom animations
- Timing adjustments & ease-in/out

Module 4: Behaviors & Replicators

- Using built-in behaviors for animation
- Applying motion behaviors
- Understanding replicators & emitters
- Creating particle effects

Module 5: Working with Text & Titles

- Adding & customizing text layers
- Using text behaviors & animation
- Creating 3D text & extrusions
- Lower thirds & title templates

Module 6: Special Effects & Filters

- Applying filters & effects
- Using green screen (chroma key)
- Glow, blur, and distortion effects
- Creating cinematic looks

Module 7: Working with 3D Space

- Introduction to 3D in Apple Motion
- Using 3D cameras & lights
- Adjusting depth & perspective
- 3D object importing & animation

Module 8: Audio & Sound Effects

- Importing & managing audio
- Syncing animation to music
- Using audio behaviors
- Sound effects & audio transitions

Module 9: Templates & Publishing for Final Cut Pro

- Creating reusable Motion templates
- Customizing Final Cut Pro titles & transitions
- Publishing parameters for easy adjustments

Module 10: Advanced Techniques & Project Workflow

- Advanced animation techniques
- Building dynamic templates
- Optimizing performance & rendering
