

Certified Wireless IoT Solutions Administrator

Online Course

ZETLAN TECHNOLOGIES
www.zetlantech.com

Certified Wireless IoT Solutions Administrator

Course Modules

1. Wireless Technologies

- Maintain continued awareness of wireless technologies & apps
- Understand industry standard, certification & regulatory organizations
- Define wireless network types.

2. Radio Frequency Communications

- Basic RF wave characteristics, behaviors & measurements
- The fundamentals of modulation techniques used in wireless communication
- Basic capabilities of components used in RF communications.
- Describe the basic use and capabilities of the RF bands

3. Planning Wireless Solutions

- Identify and document the wireless system requirements.
- Identify and document system constraints.
- Appropriate wireless solutions based on requirements & constraints
- Project management practices for wireless solution planning
- The wireless solution & consider key issues related to automation
- Administer the wireless solution while considering the implications
- Plan for the technical requirements of the wireless solution
- Basic features and capabilities of common wireless solutions & plan

Certified Wireless IoT Solutions Administrator

For Enquiry: +91 8680961847

4. Implementing Wireless Solutions

- Use best practices in wireless solution implementations
- Validate wireless solution implementations
- application functionality
- Understand and implement basic installation procedures
- Implement best practices in knowledge transfer and hand-off

5. Supporting Wireless Solutions

- Troubleshoot common problems in wireless solutions
- Understand & determine the best use of scripting & programming solutions
- Understand application architectures & their impact on wireless solutions
