

CCDE - Cisco Certified Design Expert

Online Course

ZETLAN TECHNOLOGIES
www.zetlantech.com

Course Modules

1. Business Strategy Design

- Impact on network design, implementation, and optimization
- Solns based on business continuity and operational sustainability

2. Control, Data, Management plane and Operational design

- End-to-end IP traffic flow in a feature-rich network
- Data, control, and management plane technologies
- Centralized, decentralized, or hybrid control plane
- Automation design, integration, and on-going support
- Software-defined architecture and controller-based solution design

3. Network Design

- Resilient, scalable, & secure modular networks
- Technical constraints and requirements
- Operational constraints and requirements
- Application behaviour and needs
- Business requirements
- Implementation plans
- Migration and transformation

CCDE - Cisco Certified Design Expert

For Enquiry: +91 8680961847

4. Service Design

- Resilient modular network design based on constraints
- Cloud/hybrid solutions based on business-critical operations
- Regulatory compliance
- Data governance (for instance sovereignty, ownership, and locale)
- Service placement
- SaaS, PaaS, and IaaS
- Cloud connectivity (for instance direct connect, cloud on ramp, etc)
- Security

5. Security Design

- Network security design and integration
- Segmentation
- Network access control
- Visibility
- Policy enforcement
- CIA triad
- Regulatory compliance (if provided the regulation)
