CompTIA Advanced Security Practitioner (CASP+)

Course Modules

1. Risk Management CASP Introduction

- Exploring Cloud Services Act
- Acquisition Merger Demerger
- Compare and Contrast
- Execute Risk
- Continuing Terminology IT Governance
- Analyze Security Solution Metrics and Attributes
- Analyze Risk
- Trend Analysis Act

2. Research, Development and Collaboration

- Research Methods to Determine Industry Trends
- Practicing Threat Intelligence Act
- Implement Security Activities Across
- Static Testing
- Explain the Importance of Interaction

3. Enterprise Security Architecture

- Network Device Security Act
- Application and Protocol
- Advanced Network Security Act
- Complex Network Security Solution
- Implementing VLANs Switchport Sec Act
- Distributed Denial of Service
- Exploring DoS Attacks Act
- Security Zones
- Network Access Control
- Searching for Vulnerable ICS-SCADA Act
- Analyze a Scenario Integrate Security
- Configuring Windows Firewall Act
- Log Monitoring and Auditing
- Group Policy Act
- Patch Management
- Management Interface
- Measured Launch
- Analyze a Scenario to Integrate Security Controls
- Security Implications Privacy
- Baseband
- Given Software Vulnerability Scenarios
- SQL Injection Act
- Improper Error and Exception Handling
- Buffer Overflows Act

CompTIA Advanced Security Practitioner (CASP+)

4. Enterprise Security Operations

- Runtime Debugging
- Fingerprinting an OS Services Act
- Code Review
- Conducting OSINT Act
- Conducting a Vulnerability Assessment Act
- Analyze a Scenario Output
- Network Sniffing Act
- Security Content Automation
- Using a SCAP Scanner Act
- Network Enumerator
- Password Cracking Act
- Host Vulnerability Scanner
- Using Command Line Tools Act
- OpenSSL
- Scanning for Heartbleed Act
- Local Exploitation Tools
- Verifying File Integrity with SFC Act
- Log Analysis Tools
- Given Scenario Implement Incident
- Facilitate Incident Detection Response
- Using Incident Response Support Tools Act
- Severity of Incident Detection Breach
- Technical Integration of Enterprise Security

CompTIA Advanced Security Practitioner (CASP+)

5. Technical Integration of Enterprise

- Data Security Considerations
- Examine Network Diagrams Act
- Security and Privacy Considerations of Storage integration
- Exploring Directory Services and DNS Act
- Given Scenario Integrate Cloud and Virtualization
- Taking Another Look at Cloud Services Act
- Security Advantages and Disadvantages of Virtualization
- Using Virtualization Act
- Cloud Augmented Security
- Integrate and Troubleshoot Advanced Authentication
- Scenario Cryptographic
- Mobile Device Encryption
- Cryptography Act
- Select the Appropriate Control
- Phishing Act
- Telephony VoIP Integration

Zetlan Technologies

LEARN REMOTELY!!

The efficiency of online learning in terms of time management, flexibility, and the ability to access resources anytime, anywhere can be compelling.
