

CompTIA Data Systems (DataSys+)

Online Course

ZETLAN TECHNOLOGIES
www.zetlantech.com

Course Modules

1. Understanding Database Types and Structures

- Identify Relational and Non-Relational Databases
- Understand Different Types of NoSQL Databases and Tools
- Understand Relational Database Design
- Identify Other Data Systems

2. Recognizing Standards and Commands

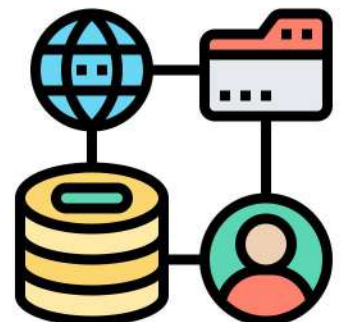

- Understand Standards and Principles
- Examine Operating Systems and Command Line Scripting

3. Running Scripts for Data and Data Systems

- Create and Alter Objects Using Data Definition Language
- Manipulate Data Using Data Manipulation Language
- Work with Transactions
- Perform Data Management Tasks

4. The Impact of Programming on Database Operations

- Work with Views
- Understand Object Relational Mapping
- Program with SQL
- Write Functions

CompTIA Data Systems (DataSys+)

5. Understanding Database Planning and Design

- Understand Types of Architecture
- Gather Data System Requirements
- Review Documentation Requirements

6. Implementing, Testing, and Deploying Databases

- Prepare for Deployment
- Conduct Testing and Other Quality Measures
- Understand Validation Techniques and Methods

7. Monitoring and Reporting on Database Performance

- Consider Database Connectivity Needs
- Monitor the Database
- Understand and Address Deadlocks

CompTIA®

8. Understanding Common Data Maintenance Processes

- Explain Patch Management
- Ensure Database Performance
- Ensure Database Integrity

9. Understanding Governance and Regulatory Compliance

- Importance of Protecting Data and Preventing Data Loss
- Understand Data Retention Policies
- Classify Data
- Consider Global Jurisdiction and Regional Regulations

ZETLAN TECHNOLOGIES

CompTIA Data Systems (DataSys+)

10. Securing Data

- Understand Data Encryption
- Understand Data Masking
- Describe Data Destruction Techniques
- Audit Data Access
- Audit Code and Changes

11. Securing Data Access

- Understand Identity and Access Management
- Understand Access Controls
- Understand Password Policies
- Work with Service Accounts

12. Securing the Database and Server

- Utilize Physical Security
- Utilize Logical Security

CompTIA®

13. Classifying Types of Attacks

- Mitigate the SQL Injection Attack
- Mitigate the Denial of Service (DoS) Attack
- Mitigate the On-Path Attack
- Mitigate the Brute Force Attack
- Mitigate Social Engineering Attacks
- Mitigate Malware

14. Planning for Disaster Recovery

- Plan for Disaster Recovery
- Conduct DR Plan Testing
- Transition/Failback to Normal Operations

15. Implementing Backup and Restore Best Practices

- Identify Types of Backups
- Implement a Backup Strategy
- Store and Purge Backups
