

# Dell Metro Node Operate

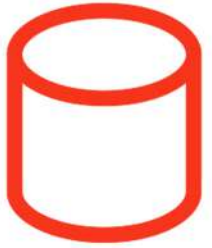

# Online Course

**ZETLAN TECHNOLOGIES**  
**[www.zetlantech.com](http://www.zetlantech.com)**

## Course Modules

### 1. Metro Node System Health

- Perform and analyze System Health check with Unisphere
- Perform and analyze System Health Check with VPLEXcli
- Perform and analyze System Health Check with Ansible

### 2. Provision Storage

- Describe and complete advanced provisioning operations
- Perform, explain, and verify volume encapsulation using VPLEXcli
- List and describe the steps for EZ provisioning operations
- List and describe the steps for EZ provisioning operations

### 3. Distributed Devices

- Describe the features and functionality of distributed devices
- Describe the functionality of distributed device options
- List the steps to complete distributed devices on a Metro node
- List and explain the process to perform volume expansion

### 4. Data Migration

- Compare extent mobility, device mobility, and batch migrations
- List the process for creating extent and device mobility jobs
- List the mobility job operations using Unisphere and VPLEXcli
- Describe the steps and features of batch migration operations
