GIAC Cyber Threat Intelligence

Zetlan Technologies

Online Course

ZETLAN TECHNOLOGIES
www.zetlantech.com

Course Modules

1. Analysis of Intelligence

Understanding of the techniques employed in analyzing informatn. The candidate will also demonstrte an undrstndg obstacl to accurate analysis, such as fallacies and bias, & how to recognize & avoid them.

2. Campaigns and Attribution

Understanding of identifying and profiling intrusion characteristics and external intelligence into campaigns. The candidate will d emonstrate an understanding of the importance of attribution & the factors that are considered when making an attribution.

3. Collecting and Storing Data Sets

Understanding of collecting & storing data from collection sources such as threat feeds, domains, TLS certificates, and internal sources.

4. Intelligence Application

Understanding of the practical application of gathering, analyzing, and using intelligence. Additionally, the candidate will demonstrate an understanding of how well-known cyber-attacks can inform cyber intelligence professionals today.

5. Intelligence Fundamentals

Understanding of fundamental cyber threat intelligence definitions and concepts. The candidate will also demonstrate a basic working knowledge of technologies that provide intelligence analysts with data, such as network indicators, log repositories, and forensics tools.

6. Kill Chain, Diamond Model, and Courses of Action Matrix

Understanding of the Kill Chain, Diamond Model, and Courses of Actions Matrix and how they are used together to analyze intrusions.

7. Malware as a Collection Source

Understanding of malware analysis tools and techniques to derive intelligence.

Zetlan Technologies

8. Pivoting

Understanding of pivoting to expand intelligence, pivot analysis, the ability to use link analysis tools, & ability perform domain analysis to expand intelligence collections.

For Enquiry: +91 8680961847

9. Sharing Intelligence

Understanding of methods and practices of storing intelligence from various sources. The candidate will demonstrate an undrstandg of the processes, tools, and techniques used in sharing intelligence.

Understanding of effectively sharing tactical intelligence with executives by writing accurate and effective reports and using such capabilities as assessments.
