

# GIAC Network Forensic Analyst

## Online Course

**ZETLAN TECHNOLOGIES**  
**[www.zetlantech.com](http://www.zetlantech.com)**

# Oracle Database 19C Data Guard Administrator

## Course Modules

### 1. Common Network Protocols

Understanding of the behavior, security risks and controls of common network protocols.

### 2. Encryption and Encoding

Understanding of techniques and practices used to encode and encrypt common network traffic and common attacks on these ctrls.

### 3. NetFlow Analysis and Attack Visualization

Familiar with the use of NetFlow data and information sources to identify network attacks.

### 4. Network Architecture

Familiar with the process to design & deploy a network employing diverse transmission and collection technologies.

# Oracle Database 19C Data Guard Administrator

**For Enquiry: +91 8680961847**

## **5. Network Protocol Reverse Engineering**

Familiar with the tools and techniques required to analyze diverse protocols and data traversing a network environment.

## **6. Open Source Network Security Proxies**

Understanding of the architecture, deployment, benefits and weaknesses of network security proxies, common log formats and flow of data in a network environment.

## **7. Security Event and Incident Logging**

- o Familiar with diverse log formats, protocols and the security impact of the event generating processes.
- o Understanding of the configuration and deployment strategies to secure and position logging aggregators and collection devices throughout a network environment.

## **8. Wireless Network Analysis**

Familiar with the process to identify and control the risks associated with wireless technologies, protocols and infrastructure.
