Google Professional Data Engineer

For Enquiry: +91 8680961847

1. Architecting low-code ML solutions

- Developing ML models by using BigQuery ML
- Building AI solutions by using ML APIs
- Training models by using AutoML

2. Collaborating within & across teams to manage data & models

- Exploring and preprocessing organization-wide data
- Model prototyping using Jupyter notebooks
- Tracking and running ML experiments

3. Scaling prototypes into ML models

- Building models
- Training models
- Choosing appropriate hardware for training

4. Serving and scaling models

- Serving models
- Scaling online model serving

5. Automating and orchestrating ML pipelines

- Developing end-to-end ML pipelines
- Automating model retraining
- Tracking and auditing metadata
