- Healing Brush, Patch Tool, and Spot Healing Brush
- Content-Aware Fill for removing objects
- Frequency separation for skin retouching
- Restoring old or damaged photos

## **Module 6: Working with Text and Shapes**

- Adding and formatting text
- Using text effects and layer styles
- Creating custom shapes and icons
- Working with Smart Objects

## **Module 7: Advanced Image Manipulation**

- Transforming and warping objects
- Liquify tool for reshaping elements
- Perspective and distortion correction
- Using Puppet Warp for creative effects

## **Module 8: Color Correction and Grading**

- Color balance and selective color adjustments
- Using Gradient Maps for color grading
- Applying LUTs (Look-Up Tables)
- Creating cinematic and vintage effects

## **Module 9: Creative Effects and Filters**

- Applying Photoshop filters and effects
- Using Neural Filters for AI-based enhancements
- Creating double exposure effects
- Glitch, dispersion, and surreal effects

## **Module 10: Working with Smart Objects and Actions**

- Understanding Smart Objects
- Creating and applying actions for automation
- Batch processing multiple images
- Using Photoshop scripts

## **Module 11: Compositing and Digital Art**

- Blending multiple images into a single composition
- Creating fantasy and surreal compositions
- Working with brushes for digital painting
- Using custom textures and overlays

## **Module 12: Exporting and Output Optimization**

- Saving files in different formats (JPEG, PNG, PSD, TIFF)
- Exporting images for print and web
- Understanding color profiles (RGB vs. CMYK)
- Optimizing images for social media

## **Bonus Module: Photoshop for UI/UX & Social Media Design**

- Creating social media posts and banners
- Designing website and app UI mockups
- Working with grids and guides
- Exporting assets for development
