COURSE MODULES

Module 1: Introduction to CorelDRAW

- Overview of CorelDRAW and its uses
- Understanding the CorelDRAW interface
- Setting up a new document
- Navigating the workspace, toolbars, and panels
- Customizing the workspace

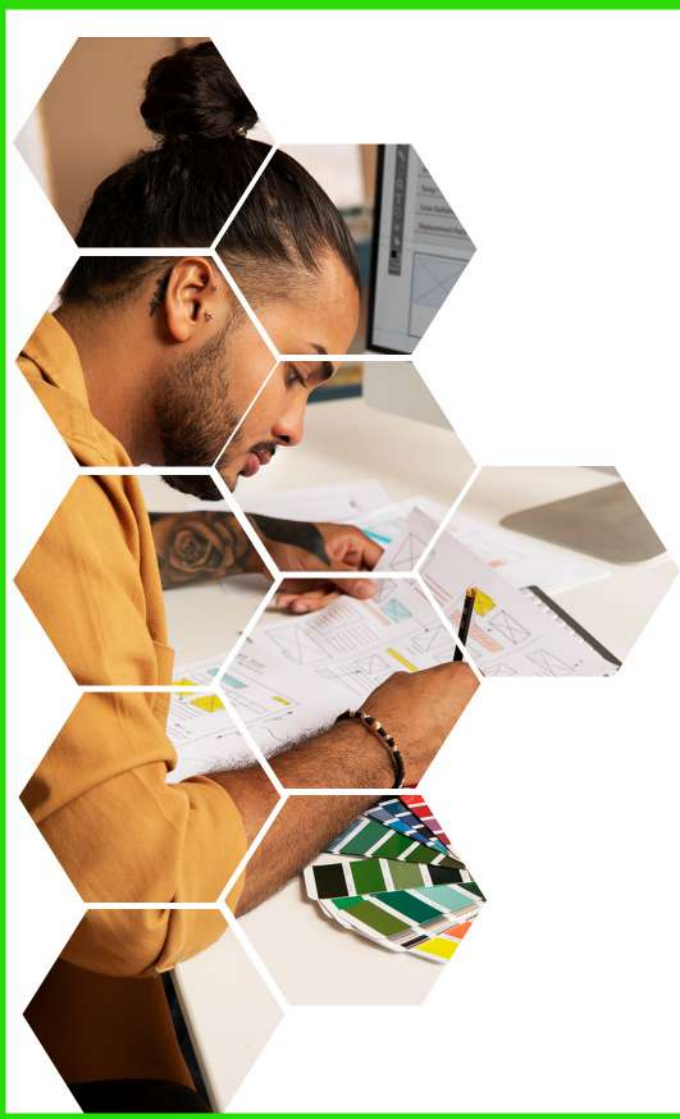

Module 2: Basic Drawing & Shapes

- Creating and modifying basic shapes
- Using the Freehand, Bezier, and Pen tools
- Understanding nodes and curves
- Transforming, scaling, rotating, and aligning objects

Module 3: Working with Colors & Fills

- Understanding RGB, CMYK, and Pantone colors
- Applying solid colors, gradients, and patterns
- Using the Interactive Fill Tool
- Transparency and blending modes

Module 4: Working with Text & Typography

- Adding and editing text
- Formatting fonts, sizes, and spacing
- Converting text to curves
- Creating artistic and paragraph text
- Applying text effects and text on a path

Module 5: Advanced Drawing & Vector Editing

- Using the Shape tool to edit curves and nodes
- Working with the Smart Drawing Tool
- Creating and modifying custom shapes
- Using PowerClip to insert images inside objects
- Working with contours, shadows, and envelopes

Module 6: Working with Images & Bitmaps

- Importing and editing images
- Tracing bitmaps to vectors (PowerTRACE)
- Applying special effects to bitmaps
- Cropping, resizing, and masking images
- Converting images to black and white or grayscale

The background of the slide features a faint, artistic illustration of a laptop screen displaying the words "Creative Design" in a large, light font. To the left of the laptop, a hand is shown holding a pen, poised to write. The entire scene is set against a light, textured background with soft, wavy green lines on the right side, suggesting a creative and professional design environment.

Module 7: Advanced Effects & Blends

- Using the Blend, Extrude, and Distort tools
- Applying drop shadows and transparency effects
- Creating perspective and 3D effects
- Using the Mesh Fill tool for realistic shading

Module 8: Layout & Design Principles

- Setting up pages and working with multiple pages
- Using grids, guides, and rulers
- Working with layers for better organization
- Creating business cards, brochures, and flyers

Module 9: Printing & Exporting

- Understanding print settings and color management
- Exporting to different file formats (PDF, AI, EPS, PNG, JPG)
- Preparing files for professional printing
- Understanding bleed, margins, and resolution
