Advanced HPE Storage Solutions

Course Modules

1. Describe advanced storage architectures and technologies.

- o Describe technologies & typical use cases for SAN technologies
- o Describe typical use cases for multi-site storage network mngmnt.
- o Evaluate and recommend advanced backup systems technology.
- o Describe typical use cases for multi-site data protection & busns
- o Describe typical use cases for unified block, file, & object storage

2. Describe & evaluate HPE Storage portfolio & associated service

- o HPE enterprise storg strategy for multi-site & multi-array solutions.
- o Given a set of business rqurmnts, position HPE Storage solutions
- o Identify and recommend HPE storage tools and resources

3. Present the strengths of the HPE storage portfolio relative

- o Storage market & identify the strengths of HPE Storage Solutions
- o Dffrntd competitive advantage and business value in multi-site

4. Plan and design complex HPE Storage solutions

- o Given a scenario, size multi-site and/or complex storage solutions.
- o Given a scenario, plan and design multi-site
- o Given a scenario, develop a proposal with a business value sttmnt
- o Present multi-site and/or complex solutions to the customer.

5. Validate the install, config, and setup of complex HPE Storage solutions

- o Validate data replication and transparent failover features specific
- o Validate HPE integrations & recommended performance tuning
- o Configure an HPE storage solution for a multi-vendor environment.

6. Performance-tune, optimize, and upgrade HPE storage solutions

- o Identify & compare the existing solution design
- o Recommend performance-tuning optimizations

7. Troubleshooting multi-site or complex HPE Storage solutions

- o Identify system issues and failures in HPE Storage solutions.
- o Create & propose an action plan to resolve the issue/failure in HPE
- o Recommend preventative measures on HPE storage solutions.

Zetlan Technologies

8. Manage & operate multi-site or complex HPE storage solutions

- o Manage and administer storage in an HPE Storage solution.
- o Manage and administer data protection in an HPE Storage solution.
- o Manage & administer FC and IP storage networks in an HPE Storage
- o Develop customer's policy for compliance in an HPE Storage solution
- o Test and implement a site failover & recovery plan in response
