Block Storage Solutions Implementation

Course Modules

1. Block Storage Architecture

- Describe the VSP 5000 architecture.
- Describe the ADR components.
- Describe the license model of Hitachi storage.

2. Block Storage Design

- Describe HDP pool design concepts.
- Demonstrate knowledge of storage allocation design.
- Demonstrate knowledge when to use external virtualization.
- Demonstrate knowledge when to use a virtual storage machine
- Describe how to design an Ops Center implementation.
- Describe which tools are used to size solutions.
- Knowledge of how to validate supported server storage config

3. Block Storage Deployment

- Demonstrate knowledge of initial block storage config activities.
- Which initial storage features must be set up before the system
- Demonstrate knowledge of how to implement encryption.
- Knowledge of how to implement Ops Center Administrator .
- Knowledge of which testing task(s) & handovered documents

Block Storage Solutions Implementation

4.Block Storage Integration

- Describe the steps to integrate a VSP system in Ops Center.
- Demonstrate knowledge of basic host connectivity.
- Demonstrate knowledge of how to integrate block storage
- Knowledge of how to integrate third-party products with Ops .

5.Block Storage Management

- Demonstrate knowledge of how to define alerts and notificatns.
- Describe block storage performance monitoring tools.
- Describe which storage management interfaces are available.

6.Block Storage Support

- Knowledge of how to determine any hardware-related issue
- Knowledge of how to extract reports from Ops Center Analyzer.
- Knowledge of how to collect or upload required info needed
- Demonstrate knowledge of available Hitachi support resources
