Replication and Migration Solutions

Course Modules

1. Replication and Migration Planning

- Describe the preparation for initial migration planning.
- Difference between GAD/NDM and NDM/UVM-based migratns.
- Demonstrate knowledge of diff use cases of TC, HUR, GAD, 3DC.
- Demonstrate knowledge of migrating older storage systems
- Describe the process used to size a replication solution.
- Describe the migration or replication coverage tools.
- Demonstrate knowledge of use cases for HTI/HTIA or SI clone.

2. Replication and Migration Design

- Describe the components needed for Remote Replication.
- Describe the components needed for In-system Replication
- Knowledge of the processes of Hitachi controller-based migratn
- Knowledge of how to group servers into migration events.
- Describe VSM design considerations.

3.Replication and Migration Implementation

- Demonstrate knowledge of how to configure remote replication.
- Demonstrate knowledge of how to config in-system replication.
- Demonstrate knowledge of how to prepare a migration event.
- Demonstrate knowldg of how to implement the different settings
- Demonstrate knowledge of replication software tools.

4.Replication and Migration Support

- Describe common problems during a migration implementation.
- Describe common problems during a replication implementatn.
- Describe replication management concepts.
- Demonstrate knowledge of how to troubleshoot replication
