Course Modules

1. **Hitachi NAS overview**
   - Describe the Hitachi NAS systems.
   - The architecture and functionality of the Hitachi NAS systems.

2. **Configuration and management**
   - Describe the Hitachi NAS systems cabling & network connectivity.
   - Describe how to use Hitachi NAS user accounts.
   - Describe the Hitachi NAS systems managements services.
   - Command Line Interface (CLI) associated wth Hitachi NAS systms.

3. **Clustering**
   - Describe clustering concepts.
   - Cluster Name Space (CNS) and cluster read cache features.

4. **Networking**
   - Describe the network setup of the Hitachi NAS server family.
   - Describe how to setup and use link aggregation groups.
   - Describe how to use vlan tagging with Hitachi NAS systems.

NAS Administration

5. Storage pools

- System drives chrctristcs & how they are used in the Hitachi NAS
- Describe tiered storage pools setup and utilization.

6. Enterprise Virtual Servers (EVS)

- Describe how to create an Enterprise Virtual Servers (EVS).
- Describe Enterprise Virtual Servers (EVS) security & level routing.

7. File systems

- Describe file systems' structure, specifications, and limitations.
- Describe Hitachi NAS systems file systems' features.
- Describe deduplication concepts for Hitachi NAS systems.
- Virtual volumes and quotas are used in Hitachi NAS systems.

Zetlan Technologies

8. Access protocols

- Describe file sharing in Windows and Unix/Linux environments.
- Access protocol security & the access protocols support

NAS Administration
