IBM Cloud Satellite

Course Modules

1. Motivation for IBM Cloud Satellite

- Identify customer challenges and goals
- Describe the value proposition of IBM Cloud Satellite
- Differentiate btwn Red Hat OpenShift on IBM Cloud & IBM Cloud
- Describe the RACI model as it relates to IBM Cloud Satellite

2. IBM Cloud Satellite Customer Infrastructure

- Identify customer requirements and SLAs
- Determine planned architecture & describe the components
- How to prepare for the customer's infrastructure for IBM Cloud
- Explain deploying solutions on IBM Cloud Satellite platforms
- Explain connectivity options from the customer's location to IBM

3. Setting up the IBM Cloud Satellite Location & Red Hat OpenShift

- Describe how to set up an IBM Cloud Satellite location
- Services that run on IBM Cloud, a Satellite cluster, & location

IBM Cloud Satellite

For Enquiry: +91 8680961847

4. IBM Cloud Satellite Security

- Explain security concerns, link, and landing zones across locations
- Describe data security on IBM Satellite locations
- Describe the types of IBM Cloud Satellite deployment options

5. Day 2 Operations

- Deploy the IBM Cloud Satellite solution
- Describe monitoring, logging, and alerts for system & user events
- Describe service updates in a satellite location

6. IBM Cloud Satellite Configuration

- Describe IBM Cloud Satellite Config
- Explain security policy implementations via Satellite Config
- Deploying resource changes to a cluster group across satellite
- Red Hat OpenShift on IBM Cloud clusters
- Explain how DevOps can be integrated with Satellite Config

7. Debugging

- Debugging the satellite location using IBM Cloud monitoring
- Describe debugging OpenShift clusters in satellite locations
- Describe service updates in a satellite location
