

# Enterprise Routing and Switching Professional (JNCIP-ENT)

**Career Catalyst  
Course**

**Digital Mastery  
Awaits**

**Expert-Led  
Instruction**

# Online Course

**ZETLAN TECHNOLOGIES**  
[www.zetlantech.com](http://www.zetlantech.com)

# Enterprise Routing and Switching Professional (JNCIP-ENT)

## Course Modules

- 1. Describe the concepts, operation, or functionality of IGPs**
  - IS-IS
  - OSPFv2 and OSPFv3
  - Routing Policy
  - Given a scenario, knowledge of how to configure, tshoot IGPs
- 2. Describe the concepts, operation, or functionality of BGP**
  - BGP route selection process
  - Next hop resolution
  - BGP attributes: concept and operation
  - BGP communities
  - Load balancing - multipath, multihop, forwarding table
  - NLRI families: inet and inet6
  - Advanced BGP options
- 3. Demonstrate knowledge of how to configure, troubleshoot BGP**
  - Implement BGP routing policy

# Enterprise Routing and Switching Professional (JNCIP-ENT)

## 4. Operation, or functionality of IP multicast

- IP multicast, multicast addressing IP multicast traffic flow
- Any-Source Multicast (ASM) vs. Source-Specific Multicast (SSM)
- RPF - concept and operation
- IGMP, IGMP snooping
- PIM sparse-mode
- Rendezvous point (RP) - concept, operation, discovery, election
- Anycast RP
- MSDP
- Routing policy and scoping

## 5. Demonstrate knowledge of how to config, tshoot, IP multicast

- IGMP, PIM-SM (including SSM)
- Implement IP multicast routing policy

## 6. Operation or functionality of advanced Ethernet switching

- Filter-based VLANs
- Private VLANs
- Dynamic VLAN registration using MVRP
- Tunnel Layer 2 traffic through Ethernet networks
- Layer 2 tunneling using Q-in-Q and L2PT

# Enterprise Routing and Switching Professional (JNCIP-ENT)

## 7. Knowledge of how to config, tshoot, advanced Ethernet switching

- Filter-based VLANs
- Dynamic VLAN registration using MVRP
- Tunnel Layer 2 traffic through Ethernet networks
- Layer 2 tunneling using Q-in-Q and L2PT

## 8. Describe the operation of various Layer 2 authentication

- Authentication process flow
- 802.1x - concepts and functionality
- MAC RADIUS
- Captive portal
- Server fail fallback
- Guest VLAN
- Considerations when using multiple authentication/access control methods

Zetlan Technologies

## 9. Operation of features that facilitate IP telephony deployments

- Power over Ethernet (PoE)
- LLDP and LLDP-MED
- Voice VLAN

## **10. Operation, or functionality of Junos CoS for Layer 2/3 networks**

- CoS processing on Junos devices
- CoS header fields
- Forwarding classes
- Classification
- Packet loss priority
- Policers
- Schedulers
- Drop profiles
- Shaping
- Rewrite rules

## **11. Operation, or functionality of Junos EVPN**

- Route types (e.g., Type 1, 2 3)
- VXLAN
- Multi-homing (e.g., active route types)

**LEARN  
REMOTELY!!**

The efficiency of online learning  
in terms of time management,  
flexibility, and the ability  
to access resources anytime,  
anywhere can be compelling.
