Course Modules

1: Introduction to SCCM:
- Overview of SCCM features and capabilities
- Understanding the role of SCCM in IT management

2: SCCM Architecture:
- Components and architecture of SCCM
- Understanding primary and secondary sites
- Distribution points and management points

3: SCCM Installation and Configuration:
- Installation prerequisites and requirements
- Configuring site settings and boundaries
- Role-based administration and security

4: Application Deployment:
- Creating and deploying applications
- Software deployment best practices
- Application deployment monitoring and troubleshooting

5: Operating System Deployment (OSD):
- Creating and customizing task sequences
- OSD deployment methods
- Driver management and image customization

6: Software Updates Management:
- Configuring software update points
- Deploying and managing software updates
- Monitoring and troubleshooting update deployments

7: Endpoint Protection:
- Configuring and deploying Endpoint Protection policies
- Monitoring and reporting on endpoint protection status
- Managing antimalware policies and setting

8: Inventory and Asset Management:
- Hardware and software inventory
- Asset intelligence and reporting
- Compliance settings and configuration baselines

9: Role-Base Access Control (RBAC):
- Configuring security roles and permissions
- Role-based administration best practices

10: Reporting and Monitoring:
- SCCM reporting tools and capabilities
- Creating custom reports
- Monitoring and troubleshooting using SCCM console

11: SCCM Troubleshooting and Best Practices:
- Common issues and resolutions
- Best practices for SCCM administration
- Performance tuning and optimization

12: Integration with Intune and Co-Management:
- Overview of Microsoft Intune
- Co-management scenarios and benefits
- Configuring and managing co-management settings

13: Upgrading and Migrating SCCM:
- Planning and performing SCCM upgrades
- Migration strategies and considerations
