

Oracle GoldenGate 12C Implementation Essentials

A photograph of a young woman with long brown hair, wearing a pink t-shirt and blue jeans, sitting on a brown leather sofa. She is smiling and looking at a silver laptop on her lap. The photo is tilted and has a white border with a torn-edge effect.

Oracle GoldenGate 12C Implementation Essentials

Course Modules

1. Oracle GoldenGate (OGG) Overview

- Describe OGG functional overview and common topologies
- Describe OGG Veridata and Management Pack functionality
- Difference between real-time data integration replication & Data Manipulation

2. Architecture Overview

- Describe OGG components
- Create the two types of Capture processes for Oracle database
- Create the three types of Replicat processes
- Difference between an Extract and Pump, and local & remote trails
- Configure OGG's process recovery mechanism

3. Install and Configure OGG

- Download and Install OGG, & differentiate between various installers
- Synchronize source and target databases with the Initial Load
- Prepare database for OGG CDC and & databases with OGG schema
- Configure OGG Replication component parameter files
- Configure the OGG Command Interface to create OGG processes
- Identify & resolve issues in heterogeneous replication & provide app
- Configure OGG utilities

4.Parameters

- Describe and compare GLOBALS versus MANAGER parameters
- Create solutions using component parameters for replication requirements
- Install OGG parameters
- Explain and identify parameters specific for non-Oracle databases

5.Mapping and Transformation Overview

- Implement use cases for transformation functions
- Implement macros

6.Configuration Options

- Describe OGG configuration options (Data Definition Language)
- Configure OGG event actions based on use cases
- Troubleshoot conflict detection and resolution
- Configure Integrated Capture, Replicat, and deployment options

7.Managing and Monitoring Oracle GoldenGate

- Manage OGG command and data security
- Implement and troubleshoot OGG Monitoring
- Config & management of the Enterprise Manager 12c plug-in
- Implement and troubleshoot OGG Veridata
