

# Oracle Hyperion Data Relationship Management Essentials

is to see our work

## Online Course

**ZETLAN TECHNOLOGIES**  
[www.zetlantech.com](http://www.zetlantech.com)

# Oracle Hyperion Data Relationship Management Essentials

## Course Modules

### 1. Implementation Scope and Risks

- Best practices for project scoping & establishing implementation
- Describe common implementation risks
- Describe phasing implementations
- Describe implementation roles and responsibilities
- Evaluate common customer issues
- Evaluate common customer strengths
- Describe testing and rollout best practices

### 2. DRM Overview

- Describe DRM key features
- Manage versions
- Manage hierarchies
- Manage nodes
- Use Property Queries
- Manage Exports / Reports
  - Use Audit Data
- Describe user roles and responsibilities
- Describe the DRM Architecture

# Oracle Hyperion Data Relationship Management Essentials

## 3.Managing the Initial Data Load

- Perform structural reconciliation
- Manage naming collisions
- Manage duplicate nodes

## 4.Managing Properties and Property Categories

- Manage properties from upstream and downstream systems
- Manage similar properties
- Manage property defaults
- Manage calculated properties (derived, inherited, lookup)
- Manage property scoping
- Manage node types
- Manage property categories
- Define and load properties and structure

## 5.Alternate Hierarchies

- Define and build alternate hierarchies
- Support differences or force consistency
- Build alternate hierarchies from attributes and an export

# Oracle Hyperion Data Relationship Management Essentials

## 6. Mappings

- Manage basic one to one or one to many mappings using properties
- Manage basic one to one or one to many mappings using hierarchies
- Manage complex many to many mappings

## 7. Managing Data Feeds

- Identify upstream and downstream systems
- Identify and analyze interfaces used
- Describe timing of feeds
- Describe file format and restrictions
- Describe Imports, Action Scripts, Blenders, and Exports
- Manage upstream data feed(s) and reconciliation
- Manage downstream data feed(s) and reconciliation
- Include skipping & padding levels in balance or recursive feeds
- Manage multiple downstream systems of the same type
- Generate mapping tables for ETL processes for downstream
- Implement automated data feed(s)

## 8. Versioning

- Manage version composition
- Manage version timings
- Manage usage of version status
- Manage sync methodology for what/when and planning versions

**For Enquiry: +91 8680961847**

## **9. Business Rules**

- Manage business rules for downstream systems
- Manage business rules for client processes
- Manage business rules to address system issues

## **10. Users**

- Manage users and assign roles
- Manage node access groups and property categories
- Manage node access for users
- Setup anonymous access

## **11. Workflow**

- Evaluate if workflow is needed & determine workflow requirements
- Integrate workflow through the request API

**Zetlan Technologies**

## **12. API Integration**

- Evaluate API integration requirements
- Integrate through the public API

**LEARN  
REMOTELY!!**

The efficiency of online learning  
in terms of time management,  
flexibility, and the ability  
to access resources anytime,  
anywhere can be compelling.
