**Online
Course**

# Course Modules

## 1. Host Elements

- Identify host connectivity components used in a support matrix
- Describe host-based functions for storage
- Identify storage mapping elements
- Describe virtualization concepts and techniques
- Describ data storage planning for various business applications
- Describe how to improve performance for host applications

## 2. Storage Protocol Concepts

- Identify NAS components
- Identify Fibre Channel SAN components
- Identify Ethernet/IP SAN components
- Describe DCBX switching technology
- Identify the software storage model

## 3. Storage Hardware

- Identify host to SAN components
- Identify Flash technology for enhancing applications
- Describe the different RAID levels
- Describe disk technologies
- Identify DAS technology

## 4.Disaster Recovery

- Identify backup technologies
- Describe backup types
- Describe disaster recovery concepts

## 5.Storage Functions

- Describe storage security methods
- Identify storage management technologies
- Describe data reduction techniques

## 6.Cloud Storage

- Identify Cloud storage method
- Identify Cloud storage types

**LEARN REMOTELY!!**

The efficiency of online learning
in terms of time management,
flexibility, and the ability
to access resources anytime,
anywhere can be compelling.
