Course Modules

1. Architecture and Technologies

- Identify the basic concepts of SDDC.
- How virtual ntwrkg addresses traditional networking challenges.
- Identify the Software Defined Networking (SDN) building blocks.

2. VMware Products and Solutions

- Identify vSphere networking concepts.
- Identify the VMware products that are part of the SDDC solution.
- Identify the components of vSphere.
- Identify the key features of vSphere
- Identify the product that supports the use case.
- Identify the benefits of NSX Data Center.
- The high-level component of the NSX architecture interacts.
- Roles of each of the high-level components of the NSX archtctre.
- Identify the functionality of the NSX-T features.

Planning and Designing

Installing, Configuring, and Setup

Performance-tuning, Optimization, Upgrades

Troubleshooting and Repairing

Administrative and Operational Tasks

**LEARN
REMOTELY!!**

The efficiency of online learning
in terms of time management,
flexibility, and the ability
to access resources anytime,
anywhere can be compelling.
