

VCP-CO - Cloud Operations

Online Course

ZETLAN TECHNOLOGIES
www.zetlantech.com

Course Modules

1. Architecture and Technologies

- Differentiate between VMware Cloud Management offerings
- Identify the features and capabilities of vRealize Suite Lifecycle Manager
- Identify the features and capabilities of vRealize Operations
- Identify the features and capabilities of vRealize Log Insight

2. VMware Products and Solutions

- Components & integrations within a VMware Cloud Management solution
- Role of the vRealize True Visibility Suite within a Cloud Operations solution
- Use case for Skyline, Federated Analytics and vRealize AI Cloud
- Identify the use case for vRealize Suite Lifecycle Manager
- Use case for vRealize Operations Remote Collectors, Cloud Proxies
- Identify the use case for vRealize Log Insight and Log Insight Cloud

3. Planning and Designing

- Describe the different architectures for vRealize Operations
- Describe the different architectures for vRealize Log Insight
- Size a vRealize Log Insight deployment based on a given scenario
- Size a vRealize Operations deployment based on a given scenario
- Use case for vRealize Operations Remote Collectors, Cloud Proxies

VCP-CO - Cloud Operations

4. Installing, Configuring, and Setting Up

- Identify the pre-requisites for the installation (DNS, NTP, etc)
- Identify the steps for deploying vRealize Suite Lifecycle Manager
- Identify the steps of manual installation of vRealize Operations
- Identify the steps of installing vRealize Operations using vRealize Life Cycle
- Identify the steps of manual installation of vRealize Log Insight
- Steps of install of vRealize Log Insight using vRealize Life Cycle
- Config identity & access management (RBAC) in vRealize Operations
- Config data sources in vRealize Operations and vRealize Log Insight
- Configure management and content packs in vRealize Operations
- Describe setting up content management in vRealize Suite Lifecycle
- Integrate vRealize Operations and vRealize Log Insight

Performance-tuning, Optimization, Upgrades

5. Troubleshooting and Repairing

- Identify how to generate log bundles (vRealize Operations)
- Describe options for managing vRealize Operations cluster
- Options for managing vROps/ vRealize Log Insight admin & root password
- Options for changing the authentication provider in vRealize Suite Lifecycle
- Troubleshoot common vRealize Log Insight Cluster performance
- Troubleshoot common vRealize Operations cluster performance
- Troubleshoot common vRealize Suite Lifecycle Manager performance

6.Administrative and Operational Tasks

- Identify the process for completing administrative day 2 tasks
- Manager
- Process for completing operational day 2 content tasks within vRealize
- Manage Authentication and User Access Control
- Manage vRealize Operations Licensing and Licensing Groups
- Configure vRealize Operation Event Log Forwarding
- Apply patches or upgrades to vRealize Operations without vRealize
- vRealize Operations
- Create and Manage vRealize Operations Custom Dashboards, etc
- Manage Alerts, Symptoms and Notifications
- Optimize the performance of a managed VMware Cloud environment
- Optimize the capacity of a managed VMware Cloud environment
- Plan a workload, infrastructure, or cloud migration
- Assess the cost of a managed VMware Cloud Environment
- Monitor Operating Systems and Applications
- Manage jobs with Automation Central vRealize Log Insight
- Manage authentication and access in vRealize Log Insight
- Apply patches or upgrades to Log Insight without vRealize Suite
- Configure and manage vRealize Log Insight Agents
- Config log forwarding, log masking and log filtering in vRealize Log
- Configure and manage retention and archiving settings
- Configure and manage the system notifications
