# VCAP- Data Center Virtualization Deploy

## Course Modules

**Architectures & Technologies - There are no testable objectives**

**Products and Solutions - There are no testable objectives**

**Planning and Designing - There are no testable objectives**

### 1. Installing, Configuring, and Setup

- Set up VMware vCenter Server® and single sign-on (SSO)
  - Deploy and configure VMware vCenter Server® and VMware ESXi™
  - Configure identity sources
- Set up a clustering solution for VMware vSphere High Availability (HA)
  - Configure and manage High Availability options
- Set up a cluster soln for VMware vSphere® Distrbtd Resource Schdlr
  - Configure VMware vSphere® vMotion
  - Configure scalable shares
- Set up a cluster solution for VMware vSAN™
  - Set up a cluster solution for VMware vSAN™

### 2. Performance-tuning, Optimization, and Upgrades

- Manage advanced virtual machine configurations
  - Identify and implement vSphere® resource optimization opportunities

# VCAP- Data Center Virtualization Deploy

## 3.Troubleshooting and Repairing

- Troubleshoot resource issues
  - Troubleshoot vSphere® configuration issues
  - Tshoot resource pool config issues (e.g. Limits/Sharing, hierarchy)
  - Troubleshoot virtual machine (VM) issues
- Troubleshoot network and storage issues
  - Troubleshoot storage issues
  - Troubleshoot network issues
- Troubleshoot vSphere® infrastructure issues
  - Troubleshoot VMware ESXi ™ host issues
  - Troubleshoot resource issues of the VMware vCenter Server®
- Troubleshoot vSphere® 7.x clusters
- Tshoot virtual machine reservations and VMware Admission Control

Zetlan Technologies

## 4.Administrative and Operational Tasks

- Set up networking and storage
  - Deploy and manage VMware vSphere® Standard Switch (vSS)
  - Deploy and manage VMware vSphere® Distributed Switch (VDS)
  - Configure and manage advanced storage configurations

ZETLAN TECHNOLOGIES

# VCAP- Data Center Virtualization Deploy

- Set up log collection and VMware vCenter Server® backup
  - Manage and review VMware vSphere® log files
  - Configure VMware vCenter Server® file-based backup
  - Config & manage VMware vCenter Server® backup & restore options
  - Configure VMware vCenter Server® profiles
- Manage and remediate host and clusters
  - Configure and manage advanced cluster configurations (
  - Create and manage host profiles (e.g. edit and apply host profiles)
  - Manage and remediate clusters using vSphere® Lifecycle Manager
  - Configure and manage Lifecycle Manager™ components
- Work with content libraries
  - Configure and manage a content library
  - Update virtual machine templates in a content library
- Configure role-based access control (RBAC)
- Configure and manage advanced security options
  - Configure CPU scheduler for security options
- VMware vSphere® virtual machine encryption (VM encryption)
  - Configure and manage a Key Management solution
  - Create an encrypted virtual machine
- Configure and manage advanced host configurations
  - The VMware Tools & vSphere Client repository (productLocker).

**LEARN  
REMOTELY!!**

**The efficiency of online learning in terms of time management, flexibility, and the ability to access resources anytime, anywhere can be compelling.**
